

INSTRUCTIONS FOR MOUNTING THE LARGE SIZE (T-3) MAILBOX ON THE RETURN-TO-CENTER MAILBOX POST SYSTEM

Note: In addition to the Jumbo mailbox, you'll need to have the Jumbo Mounting Plate Adapter

- Install Return-to-Center Mailbox Post System as per instructions (available in PDF form on web site).
- Place the Jumbo Mounting Plate Adapter over the existing Mailbox Mounting Bracket attached to the Mailbox Mounting Arm with the outward flanges facing down. The two center mounting flanges should straddle the welded-on Mailbox Mounting Bracket.
- Align the holes on inside mounting rails of the Jumbo Mounting Plate Adapter with the adjustable nylon sliding fasteners (or holes) on the side of the welded-on Mailbox Mounting Bracket.
- Insert each of the four ½-inch 10 x 24 machine bolts (or ½-inch screws if the welded on mailbox mounting base has adjustable nylon sliding fasteners) through the Jumbo Mailbox Mounting Base and into the adjustable nylon sliding fasteners (or the four holes) and tighten securely.
- Set the Jumbo (T-3) mailbox over the mailbox mounting flanges on the Jumbo Mailbox Mounting Plate Adapter.
- Align the holes and install the four ½-inch 10 x 24 machine bolts (or screws) through the mailbox and into the mounting plate adapter.
- Your Return-to-Center Mailbox Post System should be ready to use!
